COFLEX LF^2

OVIK's CoFlex LF^2 is ideal for high-risk patient populations and surgical patients. CoFlex LF^2 is designed to provide comfort to patients with sensitive skin, eliminate the risk associated with latex sensitivity and protect the sterile field in surgical procedures.

- Soft and comfortable – gentle on the skin
- Ideal for OR application
- Water resistant for arthroscopic procedures**
- Sticks directly to a wet primary dressing
- EasyTear technology*
- Controlled compression – will not constrict or loosen over time
- Stays in place – does not shift or unravel with use

CoFlex LF^2 is available in color pack or tan!

Color Pack (CP)
Red, Blue, Neon Pink, Neon Green, Purple, Light Blue

Tan (TN)

Not made with natural rubber latex

COFLEX NL

OVIK's CoFlex NL is a worry-free choice designed for use by everyone, everywhere. CoFlex NL provides excellent self adherence, excellent controlled compression, and excellent versatility to meet the multiple needs of an entire healthcare facility.

- Largest latex-free product offering with more than 90 options
- EasyTear technology
- Controlled compression – will not constrict or loosen over time
- Stays in place – does not shift or unravel with use
- Breathable and lightweight
- Made in the USA

Not made with natural rubber latex

HCPCS CODES
(Healthcare Common Procedure Coding System Codes)

Product	Size	HCPCS Code
CoFlex CoFlex Med CoFlex NL CoFlex LF[2]	1" x 5 yds. 1.5" x 5 yds. 2" x 5 yds.	A6453
CoFlex CoFlex Med CoFlex NL CoFlex LF[2]	3" x 5 yds. 4" x 5 yds.	A6454
CoFlex CoFlex Med CoFlex NL CoFlex LF[2]	6" x 5 yds.	A6455

*Centers for Medicare & Medicaid Services (CMS) has verified that the HCPCS codes listed above have been assigned to Andover Healthcare, Inc.
(Updated July 2015)

APPLICATION AND REMOVAL TIPS

1. The CoFlex family of bandages will not loosen or tighten over time, therefore you should wrap the bandage at desired tension and compression.
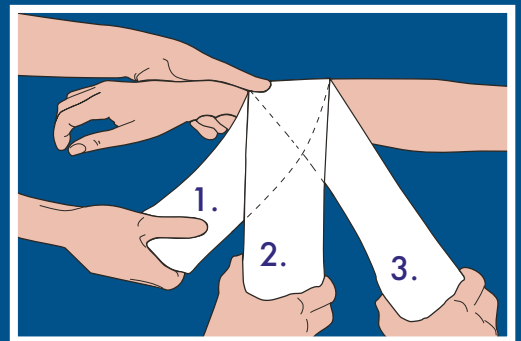

2. Upon completion of wrapping, grasp bandage between fingers and remove stretch - hand-tear* or cut the bandage to desired length. Relax the last 2" of bandage and then press down.

3. Seal the end of the bandage wrap with your finger, lightly meshing the top of the bandage into the bottom layer. This will provide long staying power.

Removal: CoFlex bandages may be removed by unwrapping or with bandage scissors.

YOU CONTROL THE TENSION

1. No to low tension
2. Medium tension
3. High tension
